

# Data-driven digital contract capabilities

An efficient, compliant and future-ready toolkit for brokers

## Enabling brokers to be fit for the future

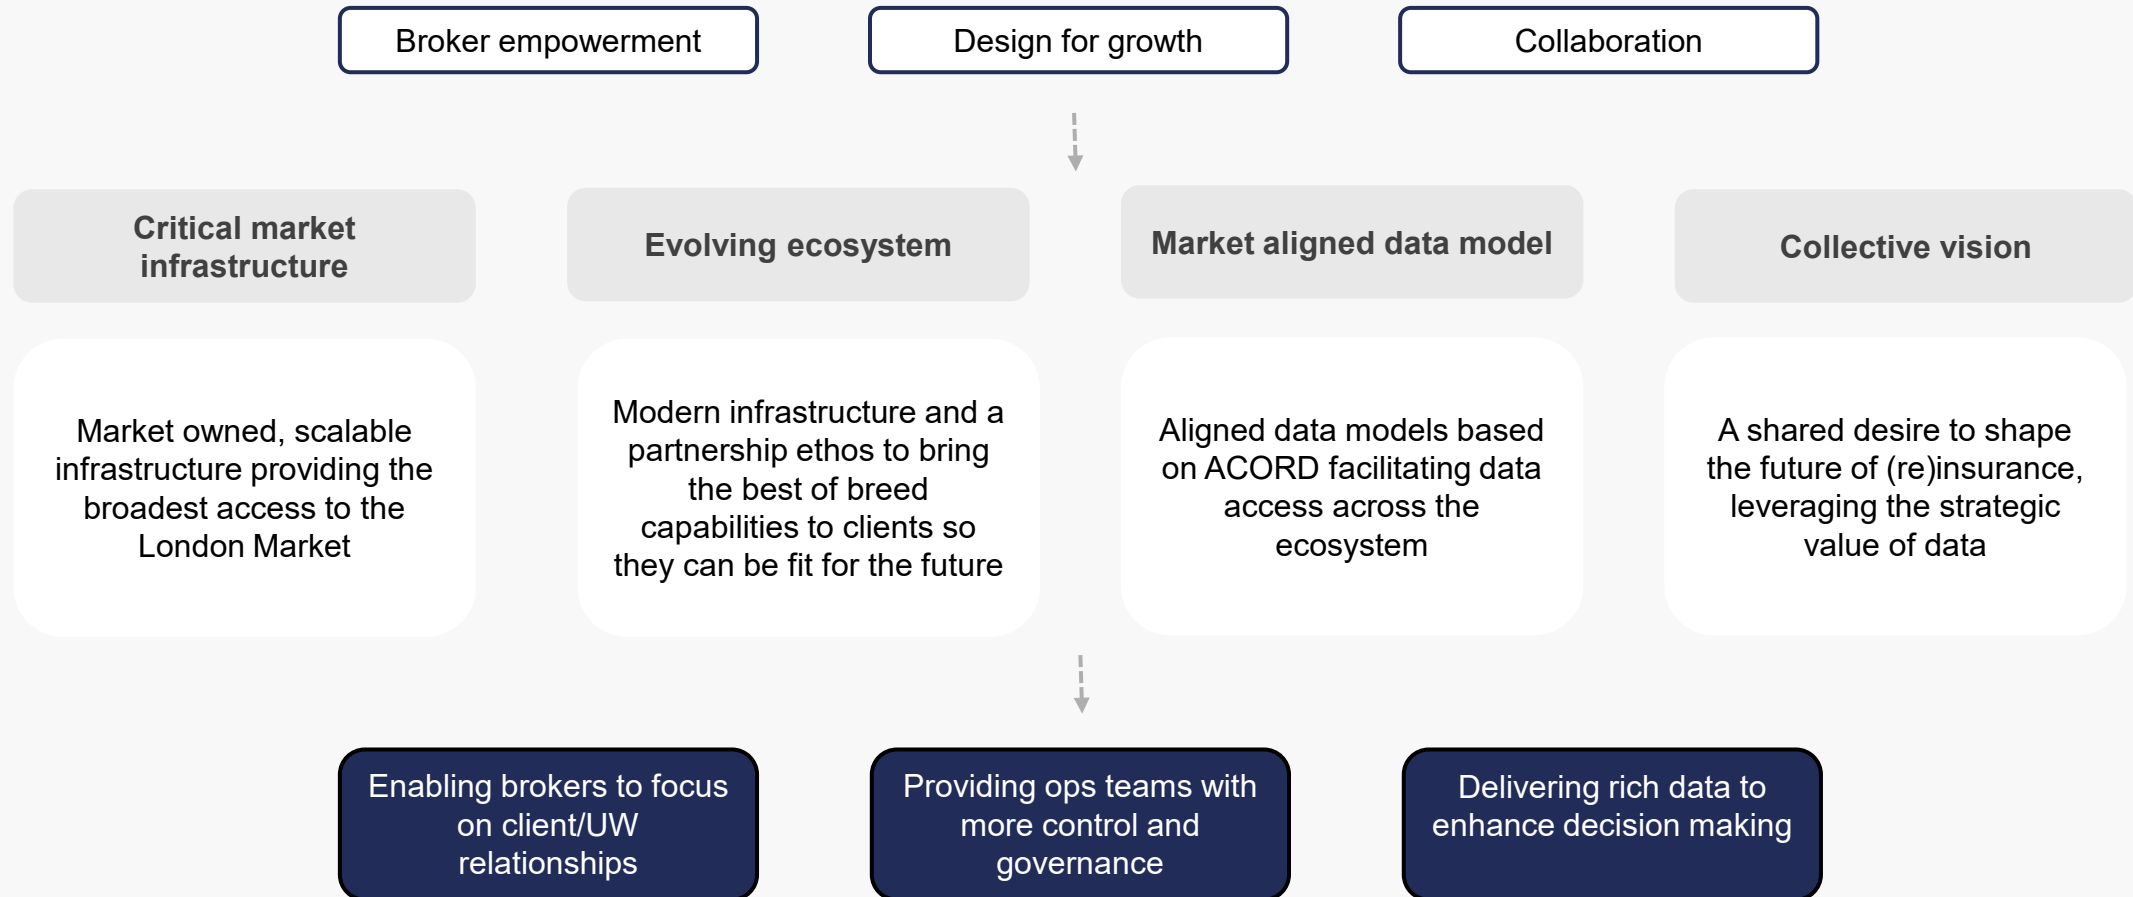

Empowering brokers and carriers through an intuitive trading platform powered by an intelligent data hub

# artificial.

Proven broker tools that reduce operational expense and empower brokers to make better use of their data.

# Shared beliefs and dedication to specialty (re)insurance

## Addressing the challenges of document-first processes

- 1.** Complex, inefficient processes increase operational costs and reduce agility.
  - 2.** Highly skilled brokers and carriers are forced to spend valuable time on basic administrative tasks.
  - 3.** Data quality issues arise, limiting access to key insights and the ability to make informed decisions quickly.
- +** Requirement to transition to MRC3 and CDR regulations

### 6 Key Pain Points

**Paper is still the method of data transmission**

**Data needs to be re-entered multiple times**

**No unified view of data**

**Late identification of errors**

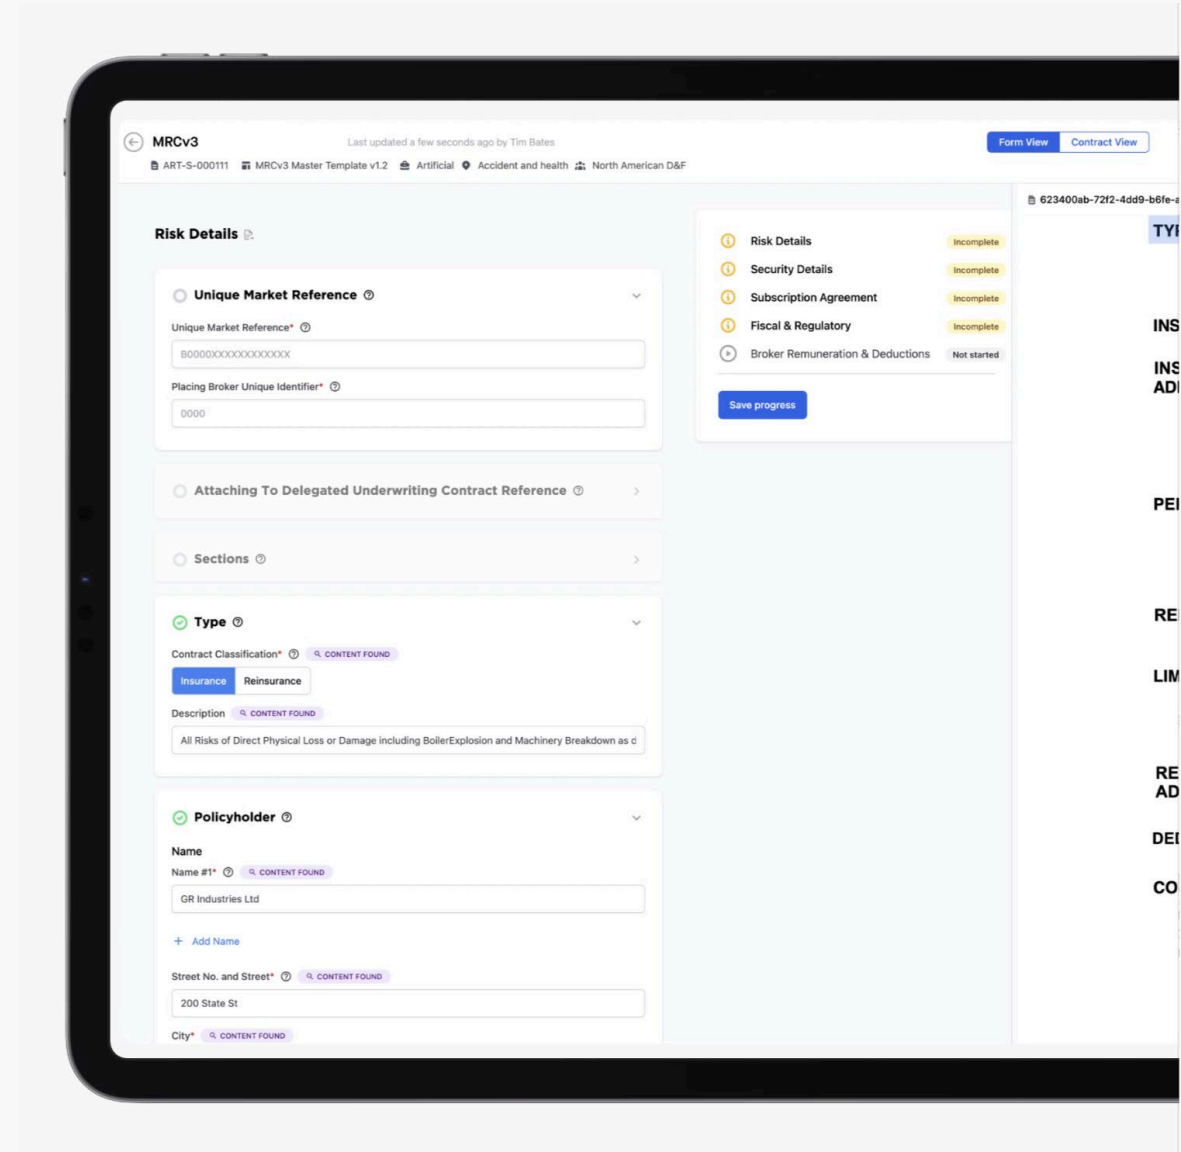

**Manual intervention and lack of automation**

**Placing process lacks a clear audit trail**

# Fully integrated, market-leading Contract Builder proposition

## Core features

- Familiar MS-style editing capabilities
- ACORD aligned MRCv3 Contract creation
- Bloc structure for line of business variation
- Template and contract audit log
- Data synchronization throughout the process
- Full role and permission management
- API connections to in house / 3<sup>rd</sup> party systems

## Benefits

### Efficiency:

- Removal of re-keying across end-to-end process

### Strengthened Control & Operations Governance:

- All templates and submissions are aligned centrally
- Errors and omission risk limited through synchronisation
- Integrated solution to reduce IT overhead

### Future Ready:

- MRCv3 structured data
- Functionality built for digital negotiation
- API Connectivity – systems and teams
